Workshop titled "Developing Education through Artificial Intelligence"

The Deanship of Student Affairs at Al Ain University (Abu Dhabi campus), in collaboration with the College of Education, Humanities, and Social Sciences, organized a workshop titled "Developing Education through Artificial Intelligence." presented by Professor Mohammed Hassan to the students of the Educational Diploma at Al Ain University.

The aim of the workshop is to highlight the potential that artificial intelligence offers in the field of education, and how these modern technologies can be used to improve the quality of education and enhance student interaction. The workshop included an introduction to the concept of artificial intelligence and its applications in the educational context.

The workshop program covered several key topics, including personalized learning, intelligent assessment, and interactive lessons. Additionally, it addressed the promising opportunities that artificial intelligence presents for improving access to educational resources.

The workshop witnessed significant interaction from the students, who showed clear interest in the topic and participated in fruitful discussions. They raised many questions about the applications of artificial intelligence in education and future challenges.

The Deanship of Student Affairs hopes that this workshop will be the beginning of a series of future events that support innovative and advanced education at Al Ain University.
